F-35 COCKPIT DEMONSTRATOR AND ELITE SUPPLIER AWARD EVENT AFTER ACTION REPORT

CRISSAIR, INC. – VALENCIA, CA
August 20 – 24, 2018

Overview

On August 20 – 24, our team executed a successful F-35 cockpit demonstrator and Elite Supplier Award recognition event with Crissair, Inc. in Valencia, CA.

Congressman Steve Knight (R-CA-25) served as the guest of honor and VIP speaker. The event also featured remarks from Jack O'Banion, Vice President of Strategy and Customer Requirements, Lockheed Martin Skunk Works, Mike Alfred, President, Crissair and Vic Richey, Chairman & CEO, ESCO Technologies.

During the speaking program, Jack O'Banion recognized Crissair and its employees for their contributions to the F-35 program and Crissair President Mike Alfred honored the company's veterans, surprising them with F-35 flight jackets. Congressman Knight participated in the recognition ceremony and flew the cockpit immediately following. He and his staff then participated in a personalized tour of the facility.

There were 65 attendees at the event, including Santa Clarita Mayor Laurene Weste, Santa Clarita City Councilmembers Bill Miranda and Cameron Smyth, Castaic Area Town Councilmember Sandia Ennis, and field representatives from the offices of State Senator Scott Wilk (R-21), Assemblyman Dante Acosta (R-38) and L.A. County Supervisor Kathryn Barger. Additional VIP attendees at the event included: Santa Clarita Economic Development Corp. President Holly Schroeder, Santa Clarita Valley Chamber of Commerce Chairman Troy Hooper, as well as faculty and students from the Hart School District.

Mercury's communications team developed and executed the media outreach plan to earn coverage of the event. [KABC-7](#) arrived prior to the event to capture footage of test pilot Craig Dalle operating the demonstrator. Also attending the event were Santa Clarita Valley local newspaper, [The Signal](#), as well as local talk radio station [KHTS-FM](#). Reporters from both The Signal and KHTS had the opportunity to interview Congressman Knight, as well as Lockheed Martin and Crissair officials. The [SCV Beacon](#) and [Aerotech News](#) also wrote about the event, while the [SCV Economic Development Corp](#) published a blog. The San Fernando Valley Business Journal has indicated that it include coverage of the event in a column for its September 3rd edition.

Sixteen employee briefing sessions were held over the course of our stay, enabling 208 Crissair employees to learn about the program and experience the F-35 cockpit demonstrator. The cockpit team also briefed 11 local AIPAC VIPs, offering all 11 the opportunity to fly in the cockpit and learn more about the F-35's impact on the security of Israel.

Enclosed is the final attendee list, photos from the event, media coverage and social media activity, including tweets from Congressman Steve Knight and Supervisor Kathryn Barger.

A sea of hands went up in a room filled with scores of individuals when asked if they knew someone or had heard from someone affected by the 2017 Las Vegas shooting.

"We've been saying the words 'active shooter' a while but none now," Jenny Kotchepov, vice president and training manager at Citizens Business Bank, said Tuesday to the crowd that filled the ballroom at the Hyatt Regency Valencia. "It literally brings cliffs to one about every person's case in this room."

The conversation, hosted by the Valley Industry Association as part of its monthly luncheon series, aimed to help businesses and employees prepare in the case of an active shooter incident.

Kellar suffers heart attack

Councilman says he plans to take it easy next couple of months

By **Perry Smith**
Signal Staff Writer

Santa Clarita City Councilman Bob Kellar had a heart attack Friday night and plans to take a little easier over the next couple of months, he said Tuesday.

He also had a message for those who might be concerned for their own health: "If you get those warning signs, don't ignore them."

Kellar, 74, said he was feeling well Tuesday — and days after he and his wife, Kirby, cut short a fishing trip over the weekend to Tulelake Lake.

He woke up around 1 a.m. on Sunday feeling pain in his arms and chest, he said, one of the tell-tale signs, and with little other recourse, he took some Advil and went back to sleep, he said.

The following morning, he told his wife they'd need to cut the trip short.

Lockheed Martin honors Crissair

Local aircraft contractor receives award for work on products for F-35 fighter

Craig Dallo, a Lockheed Martin employee, prepares a F-35 fighter flight simulator during an event honoring local aircraft contractor Crissair on Tuesday.

By **Crystal Dean**
Signal Staff Writer

Lockheed Martin honored local aircraft contractor Crissair Inc. on Tuesday with the 2017 Elite Supplier Award for the company's work on products for the F-35 fighter.

Local business leaders, high school students and dignitaries attended at the Valencia firm, which has been in the SCV for four years, received the honor. After the presentation, attendees had an opportunity to "fly" the F-35 in a simulator.

The Lockheed Martin F-35 Lightning II was developed in 2006. Crissair's 200 employees help make 30 types of products for the aircraft, which Lockheed Martin executive Jack O'Banion said was essential for the advancement of the program.

"It's always nice to receive awards from our customers," Crissair President Mike Alfred said. "There's a lot of synergy going on here. And it means jobs in the valley."

Lockheed Martin honored local aircraft contractor Crissair Inc. on Tuesday with the 2017 Elite Supplier Award for the company's work on products for the F-35 fighter.

Local business leaders, high school students and dignitaries attended at the Valencia firm, which has been in the SCV for four years, received the honor. After the presentation, attendees had an opportunity to "fly" the F-35 in a simulator.

The "Lockheed Martin F-35 Lightning II" was developed in 2006. Crissair's 200 employees help make 30 types of products for the aircraft, which Lockheed Martin executive Jack O'Banion said was essential for the advancement of the program.

"It's always nice to receive awards from our customers," Crissair President Mike Alfred said. "There's a lot of synergy going on here. And it means jobs in the valley."

Holly Schroeder, director of the Santa Clarita Valley Economic Development Corp., said the company is a great example of the strength of the aerospace industry in Southern California.

"We were thrilled when Crissair moved here (from Palmdale)," she said. "They are a star in the aerospace defense cluster."

Saugus High and Valencia High School students interested in aerospace engineering were selected to observe the event.

“It’s interesting that we get to look at these crazy jets,” Valencia High senior Logan Suffredini said. “And we also get to see what’s actually behind this manufacturing.”

“The cockpit display and getting to hear from the displayers is really exciting,” said Zach Fineburg, a senior at Saugus High School. “It’s cool to see what we learn in school applied to real life.”

Rep. Steve Knight, R-Palmdale, also spoke at the event.

“Crissair is working on our frontline product for the Marines and Navy, and this achievement is a testament to the significance of the people of the Santa Clarita Valley,” he said. “There are thousands of suppliers of F-35 around the country. But this shows the employees and folks working on the program here are producing a good product, on time and on budget.”

Event attendees received an update on the status of the program as well as the opportunity to try out the F-35 flight simulator to gain an understanding, from a pilot’s perspective, of how to operate the fighter jet.

In 2018, the F-35 program has more than 1,500 suppliers in 46 states and Puerto Rico, employing more than 194,000 people (direct and indirect) and generating an annual economic impact of over \$31 billion, according to a prepared statement released by Lockheed Martin.

Lockheed recognizes local F-35 supplier with prestigious award

Congressman Knight 'flies' Lightning II
VALENCIA, Calif.—Lockheed Martin showcased its F-35 Lightning II mobile cockpit demonstrator Aug. 21 to elected officials and leaders in the business community at Crissair, a subsidiary of ESCO Technologies Inc., and recipient of the 2017 Elite Supplier Award for its dedication and contribution to the success of the F-35 program.

Crissair designs and develops more than 30 different products for the F-35. House Armed Services Committee member Steve Knight, R-Calif. — spoke at the event.

"I am thrilled to be here today to recognize the contributions of the Crissair team to the development of the world's most advanced fighter," said Knight. "The fifth-generation capabilities of the F-35 are essential to our ability to combat 21st century threats. I take great pride in having the opportunity to recognize the workers in the 25th Congressional District who are an important part of making it a reality for our Armed forces and our allies."

Lockheed Martin's for Strategy and Customer Requirements Vice President for Advanced Development Programs, Jack O'Banion, praised the Crissair team.

"We are grateful for the hard work and dedication of the Crissair team to the development of the F-35 Lightning II and honored to demonstrate the capabilities of the F-35 to Congressman Knight and the community here in Valencia," said O'Banion. "The State of California and this area in particular plays a major role in the advancement of this program, supporting over 31,000 direct and indirect jobs with an annual economic impact of \$10.8 billion. It is not an exaggeration to say that we would not be where we are today without their efforts."

Mike Alfred, Crissair's president, said, "Our team of nearly 200 are proud to support the development of the F-35, the world's most advanced fighter jet. The men and women who make up this company embody the very values upon which it was built: hard-work, dedication and, most importantly, a shared commitment to the success of our clients and customers. It's an honor to have the opportunity to recognize their achievements, and specifically to highlight their contributions to the F-35 program."

During the event, attendees received an update on the status of the program as well as the opportunity to "fly" the F-35 cockpit demonstrator to gain an understanding, from a pilot's perspective, of how stealth, fighter agility, sophisticated sensor fusion and advanced computational capabilities make this the most lethal and survivable strike fighter jet ever built. The cockpit is visually and audibly interactive and provides a realistic look at the F-35's performance "flying" both air-to-air and air-to-ground missions.

The F-35 program sustains a highly-skilled workforce critical to national security and economic prosperity. In 2018, the F-35 program has more than 1,500 suppliers in 48 states and Puerto Rico, employing more than 194,000 people (direct and indirect) and generating an annual economic impact of over \$31 billion. As the program reaches full rate production, its economic impact will continue to rise.

The F-35 Lightning II is a fifth generation fighter, combining advanced stealth technology with supersonic speed, advanced sensors, enhanced weapons capacity and superior range.

Congressman Steve Knight, Lockheed Martin Honor Valencia Aerospace Manufacturer

Posted by: Devon Miller in Business, Santa Clarita Latest News August 21, 2018 - 4:00 pm 0 411 Views

Congressman Steve Knight, R-Santa Clarita, and Lockheed Martin celebrated Crissair Tuesday for the company's work on the F-35 program.

Don't miss a thing. Get breaking [KHTS Santa Clarita News Alerts](#) delivered right to your inbox.

Lockheed showcased its F-35 Lightning II mobile cockpit demonstrator during an event with elected officials and leaders to honor Crissair.

The company received the "2017 Elite Supplier Award" for its dedication and contribution to the success of the fighter jet program.

The F-35 Lightning II is a fifth-generation fighter, combining advanced stealth technology with supersonic speed, advanced sensors, enhanced weapons capacity and superior range, according to Lockheed Martin.

"I am thrilled to be here today to recognize the contributions of the Crissair team to the development of the world's most advanced fighter," said Knight. "The fifth-generation capabilities of the F-35 are essential to our ability to combat 21st century threats. I take great pride in having the opportunity to recognize the workers in the 25th Congressional District who are an important part of making it a reality for our Armed Forces and our allies."

Crissair designs and develops more than 30 different products for the F-35 in their Santa Clarita headquarters, employing more than 200 people, according to company officials.

Knight previously advocated for the Automatic Ground Collision Avoidance System (Auto-GCAS), which uses GPS tracking, avionics integration and terrain information in an effort to save lives and equipment.

If the system detects an impending collision with the surface, the computer will assume temporary control of the aircraft to execute evasive maneuvers. Upon return to a safe flight path, control is returned to the pilot, according to officials.

"We are grateful for the hard work and dedication of the Crissair team to the development of the F-35 Lightning II and honored to demonstrate the capabilities of the F-35 to Congressman Knight and the community here in Valencia," said Jack O'Banion, vice president of strategy and customer requirements for advanced development programs at Lockheed Martin.

During the event, attendees received an update on the status of the program as well as the opportunity to "fly" the F-35 cockpit demonstrator to gain an understanding from a pilot's perspective.

The cockpit is visually and audibly interactive and provides a realistic look at the F-35's performance "flying" both air-to-air and air-to-ground missions, officials said.

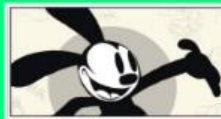

Three William S. Hart District students attended the event to give them a first-hand look at the aerospace manufacturing sector.

"Some students and parents think it's a 'dirty' thing to work in manufacturing, that they might be stuck," said Sue Reynolds-Buckley, career development coordinator for the Hart District. "Crissair does a good job of showing the opportunity and career projection in this sector."

Knight Recognizes Crissair for Excellence in Manufacturing, Earns "Elite Supplier" Award

Posted on: 08/22/2018 00:00

(Valencia, CA) - On August 21, 2018, Lockheed Martin hosted an event to recognize and honor Crissair, Inc. with the Elite Supplier Award for their excellence in support of the F-35 Joint Strike Fighter Program. The event also gave local media an opportunity to view and "fly" an F-35 Cockpit Demonstrator. Representative Steve Knight (R-CA) attended the event and gave remarks in recognition of Crissair's contributions to national security and the local economy. The event was held at Crissair's headquarters in Valencia, CA.

"The F-35 Lightning II is not just another aircraft," said Rep. Knight "It represents a generation leap in stealth, lethality, survivability, and cost effectiveness. It will be a centerpiece of the future American air and strike supremacy."

The full text of Rep. Knight's remarks can be found [here](#).

"This program has made tremendous strides since the first model came off the production line. Since then, over 300 aircraft have been delivered to the Air Force, Navy, and Marine Corps, as well as our allies around the globe. Costs have been cut nearly sixty percent, giving our forces next-generation capabilities at current-generation prices. Here in the 25th District, we are proud to have many of our local businesses provide the components and assembly for this vital program. The F-35 will bolster our national security while simultaneously bringing jobs and economic strength to our community. Thank you to Crissair President Mike Alfred for your continued service to the nation and to Lockheed Martin for hosting this event today."

Crissair, Inc. was founded in 1954 and manufactures quality precision components for both military and commercial aircraft. On the F-35, Crissair supplies precision-crafted valves, joints, adapters, and other vital components.

Representative Knight is a veteran of the U.S. Army and a member of the House Armed Services Committee, where he serves on the Subcommittee for Tactical Air and Land Forces, which has jurisdiction over the F-35 program, and the Subcommittee on Seapower and Projection Forces.

Crissair Honored by Lockheed Martin

Posted Aug. 22, 2018 by Holly Schroeder

Crissair Honored by Lockheed Martin

Santa Clarita Valley-based Crissair was recognized today by Lockheed Martin as one of their elite suppliers for the F-35 jet. This prestigious honor is given to fewer than 1% of suppliers.

Jack O'Banion, Vice President of Strategy and Customer Requirements for Advanced Development Programs at Lockheed Martin described the significant contributions that Crissair made to the F-35. Crissair is a critical supplier, providing 35 different components to the plane. O'Banion also recognized that Crissair is also an important engineering partner. He described the re-engineering of the grab hook that allows planes to land on aircraft carriers. To reduce the chance of the F-35 being detected, the hook is stored within the plane, requiring new hydraulic equipment that Crissair helped redesign. These innovations have enabled the F-35 to be used by all branches of the military.

"We are grateful for the hard work and dedication of the Crissair team to the development of the F-35 Lightning II and honored to demonstrate the capabilities of the F-35 to Congressman Knight and the community here in Valencia," O'Banion said.

Mike Alfred, President of Crissair, accepted the recognition along with other members of the leadership team.

Congressman Steve Knight was also recognized by Lockheed Martin for advancing funding that allowed new technology to be incorporated into the F35 five years earlier than previously planned. "I am thrilled to be here today to recognize the contributions of the Crissair team to the development of the world's most advanced fighter," said Knight. "The fifth-generation capabilities of the F-35 are essential to our ability to combat 21st century threats. I take great pride in having the

opportunity to recognize the workers in the 25th Congressional District who are an important part of making it a reality for our Armed Forces and our allies."

The event also showcased the F-35 Flight Simulator, in which participants can "pilot" the plane using the controls that are in the actual plane.

Crissair is a member of the Santa Clarita Valley's strong and growing Aerospace and Defense Coalition (ADC). The ADC is made up of over 80 SCV aerospace and defense companies that meet quarterly in the SCV. To support the ADC, the SCVEDC pursues the following services:

- **Industry Promotion:** Promote awareness of the SCV as a center for aerospace industries. Assist ADC in achieving its mission of supporting local businesses by collaboration among ADC companies
- **Quarterly Industry Events:** Invite well-known speakers in different subject matters to speak and interact with ADC members
- **Business Attraction & Outreach Campaigns:** Attract companies in the Aerospace and Defense cluster and promote SCV's strength in this area through integrated marketing campaign
- **Annual Guide to Workforce Training:** College of the Canyons' Economic Development Division customized recruitment and technical employee training guide, including potential use of Employment Training Panel funds to significantly reduced training program costs
- **Info & Data:** Provide economic data, real estate updates, and industry news through regular communications. Provide cost comparison analyses upon request

The image features a solid orange background with four concentric circles centered on the right side. The word "Mercury" is written in a white, serif font, positioned to the left of the circles. The period at the end of the word is a solid black dot, which is placed exactly at the center of the innermost circle.

Mercury.

THANK YOU
